GREAT IMPROVEMENT.

HAVING been engaged in Mill building for the most
of the time for the last twelve years, I have invented a
WATER WHEEL
which is durable, and at the same time simple in its con-
struction, and capable of doing more work, with less water,
than any other wheel now in use. It is suited to Grist, Saw
Mills, Cotton Gins, and any other machinery that may be
driven by water. This wheel commands the attention of every
one who has witnessed its performance, and is suited to any
location, high or low head of water, and will grind from six
to twenty bushels of wheat per hour, without any gear-
ing, belts to get out of order, and loss of time in repairing;
and yet so cheap as to place it within the reach of every one
who has a Mill of any kind.
I am now prepared to furnish wheels and put them in op-
eration, and fill orders in my line of business.
I put up Grist Mills to clean the grain of all dirt, trash
and chaff, and grind nothing but the grain—Saw Mills,
straight and circular saws on the most improved plan—
Cotton Gins, with an improved gearing that is simple, durable,
and works in performance with less wear and tear, and
all other machinery that may be wanted.
All work put up durable and in a neat style, and guaran-
teed to last. I might as well state that I have a long list of cer-
tificates, but my work will recommend itself.
Any one wanting anything in my line of business will do
well to address the subscriber at Wilmington, N. C., or at
Greenville, S. C., or at any of the places where he has a
concern. J. W. McLean, W. K. Comptie, L. B. Bass, and

DR. WILL. D. SUMMERS.

HAVING prepared a medicine to meet the various
exigencies of his profession, and permanently lo-
cated at Lillington, N. C., tenders his services to the
citizens of the village and surrounding country, and hopes
that his skill and the efficacy of his medicine will be a
merit to the confidence and patronage of the public.
May be found, when not engaged, at his Office, opposite
the above, or at the residence of Dr. J. W. McLean, or at
Orders left with Messrs. Blumenthal & Co., will be promptly
attended to.

NEW WATER WHEEL—GREAT IMPROVEMENT.

THE SUBSCRIBER, after many years of experience, he
has succeeded in inventing a WATER WHEEL, which he can
confidently recommend as being a great improvement over
all other wheels now in use, and which will give a greater
amount of water, and more durable and less liable to get out
of order than any wheel now in use or heretofore offered to the
public.
This wheel was patented on the 29th January, 1861. It
presents a packed wheel, no water can escape between the
top of the wheel and the bottom of the case, and conse-
quently all loss of power from such escape of water is
avoided.
This wheel is a reaction wheel. It is of cast iron and is
so simple in construction that any mechanic can put it in
after having once seen it done. It will, with a 12 feet
fall of water, give from 12 to 40 bushels of grain per hour, and is
suited to any head of water from 2 feet upwards. It has
only six buckets and turns out 84 square inches of water,
being all that it requires for the performance of any amount
of labor.
As above stated, this wheel is patented, and it takes plea-
sure in offering it to any person wanting a cheap, powerful
and simple water wheel, and who is not averse to a simple
circular saw mill, cotton gins, factories, or any other
kind of machinery in driving which water-power is used.
furnishing of wheels from two feet upwards, adapted
to any head of water. I will furnish mill in running or
a wheel attached to any person's mill for \$75, or I will
sell the right to use one for \$25. I will also sell County and
State Rights.
Any person wishing to purchase wheels, individual, County
or State rights, or desiring any information will receive
immediate attention by applying to or addressing James
Armstrong, John O. Armstrong, James M. Armstrong, Dob-
binville, Sampson County, N. C., their Agents, Messrs.
Hart & Bailey, Wilmington, N. C., or the subscriber,
GEORGE W. ARMSTRONG, Palmetto.

THE PATENTEE refers to the following Certificate from
competent persons who have seen the operation of his
wheel:

This is to certify, that we, the undersigned, have seen the
operation of the new Water Wheel, invented by George W.
Armstrong, of Sampson County, N. C. It grinds a bushel
of good meal in 3 minutes and 45 seconds, with 12 feet 6
inches of water, and saves half the water with comparison
of other wheels.
